REPORT OF THE TRUSTEES.

---

THE BOSTON CITY HOSPITAL,  
BOSTON, February 7, 1910.

HON. JOHN F. FITZGERALD,

*Mayor of the City of Boston:*

SIR,—In compliance with the ordinances, the Trustees of the Boston City Hospital present the following report of its condition for the year ending January 31, 1910. This is the forty-sixth annual report of the Hospital Department, which consists of the main hospital, the South Department for Infectious Diseases, the Haymarket Square Relief Station, the East Boston Relief Station and the Convalescent Home in Dorchester.

On February 1, 1909, John H. McCollom, M. D., assumed the office of Superintendent and Medical Director.

The Board of Trustees was organized on May 3, 1909, by the election of Mr. A. Shuman as President and Mr. Conrad J. Rueter as Secretary.

In July, 1909, Mr. William G. Shillaber was appointed a trustee for the term ending April 30, 1914, in place of Timothy J. Reardon, M. D., whose term of service had expired.

## EXPENDITURES.

The entire expenditures for all departments of the hospital during the fiscal year were \$601,985.79, \$100,018.47 being spent for improvement of the heating system at the main hospital, and \$501,967.32 for maintenance. Of the amount spent for maintenance, \$314,554.41 was expended upon the hospital proper; \$20,704.31 on account of the nine out-patient departments; \$109,561 on account of the South Department; \$31,509.75 on account of the Haymarket Square Relief Station; \$15,315.71 on account of the East Boston Relief Station; \$10,322.14 for the Convalescent Home. Of the total amount

spent on the Pathological Laboratory, \$11,284.08, \$7,108.97 is included in the hospital proper expenditures, \$112.84 in the Out-Patient Department, \$3,949.43 in the South Department and \$112.84 in the Haymarket Square Relief Station expenditures. Of the total amount spent on the X-Ray Laboratory and Photographic Department, \$4,438.40, \$2,663.04 is charged to the hospital proper and \$1,775.36 to the Out-Patient Department. The total amount spent in determining the settlement of non-paying patients, \$757.24, is divided evenly between the hospital proper and the South Department.

To the amount expended for the main hospital, including the South Department, \$424,115.41, there should be added the difference in the amount of stock on hand February 1, 1910, which was \$4,405.59 less than on January 31, 1909, making the total amount properly chargeable as the expenditures for maintenance of the main hospital for the year \$428,521 (see Table No. 2 in the Superintendent's report). This sum was expended for 35,399 weeks' board of patients, at a cost per capita of \$12.11, but if we deduct the money collected for paying patients, interest on trust funds and other income, the net cost to the city per capita per week was \$8.39. The cost of subsistence supplies was \$126,659.46; the total weeks' board for an average of 1,213 persons was 63,274. This gives a weekly cost per person for uncooked food supplies of \$2 per week, or  $28\frac{4}{7}$  cents per day.

The heating plant having become insufficient, owing both to its age as well as to the construction of two new buildings, it became advisable to make very extensive changes. A contract was signed with Lynch & Woodward for steam piping and other work in the power house and in tunnels and for changes in the heating system, amounting to \$35,938.05. Illustration 1 shows the old boilers. Illustration 2 gives a very good idea of the new boilers, which were installed under a contract with the Babcock & Wilcox Company, amounting to \$19,200. The tunnel from the power house to the hospital being quite small, which rendered it extremely difficult to repair any leaks in the main supply pipe, it was decided to excavate a new tunnel under Albany street. The dimensions of this tunnel are as follows: Length, 96 feet 9 inches; height,

PLATE I.—POWER HOUSE, OLD BOILERS.

PLATE 2.—POWER HOUSE, NEW BOILERS.

PLATE 3.—TUNNEL UNDER ALBANY STREET.

PLATE 4. — NEW CHIMNEY AFTER COMPLETION AS COMPARED WITH THE OLD.

PLATE 5.—MEDICAL ENTRANCE.

PLATE 6. — MEDICAL OFFICE.

PLATE 7.—HOUSE OFFICERS' SITTING ROOM.

8 feet; width, 9 feet. Illustration 3 gives a very good idea of the size of the tunnel and its general appearance. The chimney was adapted only for a limited number of boilers, and it therefore became absolutely necessary to erect a new chimney. Illustration 4 represents the new chimney just after its completion, as compared with the old chimney. The contract with Jones & Meehan for this new tunnel, new chimney, etc., amounted to \$30,753.25. In addition, Smith & Lovett had a contract amounting to \$5,101.20 for remodeling the coal handling apparatus which had become antiquated. This work on the heating system has been of immense advantage to the hospital. The consumption of coal has been limited to a very considerable extent, and the whole hospital has been heated in a much more satisfactory manner than ever before.

The Medical Building entrance, which had been in use since the opening of this section in 1877, required remodeling. This work was done by a contract amounting to \$6,875. The entire entrance was changed. Illustration 5 gives a good idea of the entrance as it now appears. The steps are protected by glass, so that a patient can be transferred from the ambulance, under cover. In the first story of the building terazzo floors were laid. The medical office was remodeled and greater privacy provided for examination of patients. Illustration 6 gives a very good idea of this room at the present time. For a long time the house physicians and internes in the Medical Department had had no comfortable sitting room. Therefore one of the rooms in the Medical Building was remodeled for this purpose. Illustration 7 gives a very good idea of this room. This change in the Medical Building has filled a long felt want.

The report of the Superintendent, presented herewith, contains a more detailed statement of the year's expenditures, various tables relating to patients admitted, and is accompanied by medical and surgical statistics and other information. These tables give in detail the number of patients treated in the various departments during the year, with classified statements of their diseases and results of treatment.

## PAYING PATIENTS.

During the year there was collected for the care and treatment of patients of all classes the sum of \$129,621.12, itemized as follows: There was received from the Commonwealth of Massachusetts for the board of patients, \$24,775.12; from various cities and towns, for hospital proper, \$18,487.97, and for the South Department, \$287.71; collected at the Superintendent's office, on account of private room and ward-paying patients, \$23,702.90; for board of paying patients at the South Department, \$8,005.38; for the board of patients at the Haymarket Square Relief Station, \$403.96; for the board of patients at the East Boston Relief Station, \$103.60. There has also been collected for the hospital, by the Board of Health, for the care of infectious cases at the South Department, and paid to the City Collector, the additional sum of \$53,854.48, making the total amount credited to the Hospital Department on account of paying patients, interest on trust funds, sale of old material and other revenue, \$131,871.62. This sum is \$5,294.42 more than was estimated as our income for this year.

## OUT-PATIENT DEPARTMENT.

The Out-Patient Department statistics may be found on pages 34, 35, 36 and 39 in the Superintendent's report.

Briefly, the total number of out-patients treated in all services during the year was 39,482; the number of visits was 135,992. The report of the X-Ray Department for the year is as follows:

Number of patients of whom photographs (A) have been made . . . . .	166
Number of patients of whom radiographs (B) have been made . . . . .	3,562
Number of patients of whom fluoroscopic examinations (C) have been made . . . . .	388
Total number of X-ray and radium treatments . . .	2,042
Total number of photographs, radiographs, examinations and treatments . . . . .	6,158
Total requisitions (A, B, C) filled . . . . .	3,728
Total number of negatives made (A, B) . . . . .	6,057

About one year has elapsed since the X-Ray Department was removed to the basement of the Burnham Memorial Building, and during that time there has been an increase of 17 per cent to 18 per cent in the number of patients treated. It has been shown that the arrangement of the space is satisfactory, and that a much larger number of patients can be well cared for here than would have been possible in the old quarters.

The demands upon the department seem likely to become greater as its usefulness to other parts of the hospital is more and more appreciated. A noteworthy indication of its value in this direction is shown by the daily resort to it of members of the Visiting Staff, and the medical as well as surgical cases sent down for X-ray examination.

On the side of treatment the most marked advances made during the year have been in the use of radium, particularly for cases of early superficial cancer. Few realize that the systematic treatment of various diseases by this remedy and its careful study have been going on for nearly seven years in this hospital. The number of patients thus treated has been greater this year than last; better methods have been devised and it is expected that the good results obtained will exceed those of previous years.

As in the past, the department has been visited by medical men from other parts of the country, many of whom have been especially interested on behalf of the hospitals in their own cities.

#### SOUTH DEPARTMENT.

The expenditure upon this department has been \$109,561. If to this is added the difference in the amount of stock on hand at the beginning and close of the year, which was \$446.20 less at the end of the year, it would give \$110,007.20 as the amount properly chargeable to maintenance. This sum was expended upon 3,123 patients, and, divided by 14,932 weeks' board, gives \$7.37 as the per capita cost per week; but if we deduct the money collected for paying patients and other income, the net cost to the city per capita per week was \$3.20. The cost of subsistence supplies was

\$31,310.19. The total weeks' board for an average of 419 persons was 21,862. This gives a weekly cost per person for uncooked food supplies of \$1.43 per week, or  $20\frac{3}{7}$  cents per day. This very small average cost is explained by the fact that 79 per cent of the patients are children. There will be found on pages 63 to 65 a detailed account of the expenditures of this department in the various subdivisions, which are kept on the same general plan as the hospital proper.

There was expended for maintenance of the hospital proper and South Department \$428,521. By dividing this amount by 35,399, the number of weeks' board given patients, the per capita cost for the two departments together was \$12.11. But if we deduct the money collected for paying patients, interest on trust funds and other income, the net cost to the city per capita per week for the two departments, taken together, was \$8.39.

During the fifteen years that the department has been in operation 36,354 patients have been received, nearly all ill with an infectious disease.

The South Department has been very crowded at times during the year, and the importance of enlarging this department cannot be overestimated. In London, in Glasgow and in Edinburgh there is a hospital bed for 9 out of every 10,000 of the population ill with an infectious disease. In Boston the ratio is 3.45 per 10,000 of the population. The following extract from the report of the Advisory Board of the South Department emphasizes the importance of increased accommodations for acute infectious diseases:

"The reports of the Committee of the South Department continue to have a general sameness in regard to the good management and the efficiency of this part of the hospital. In former years we were able to make very definite suggestions in regard to the needs of the South Department, which have now in great part been met by the new Measles Ward. We must, however, recognize that the hospital is still too small to adequately take care of the infectious diseases of the city. When the hospital is filled to its full capacity there is not sufficient air space per patient, nor is there a

system of forced ventilation by means of which the evils of crowding could in part be overcome. At present it is not possible to completely empty and thoroughly clean and dry a ward. An additional ward would greatly add to the efficiency of the hospital, and will become an imperative need in a few years."

The Measles Ward has been very satisfactory. Epidemics of measles in various institutions have been prevented by the existence of this ward. The trustees feel gratified that after twelve or thirteen years of arduous labor they have at last succeeded in obtaining this building.

#### HAYMARKET SQUARE RELIEF STATION.

This relief station has been in commission eight years. The number of patients treated during its first year was 20,150, and during the present year 35,771, an increase of 78 per cent, amply proving the judiciousness of providing public relief of this kind in that section of the city. It has accomplished a great deal of good work during the year.

#### EAST BOSTON RELIEF STATION.

The East Boston Relief Station has been in operation over fifteen months. For the year ending January 31, 1910, 8,450 ward and out-patients were treated. This station has accomplished much in the relief of human suffering, and many lives have been saved by it.

#### BURNHAM BUILDING.

The Burnham Building has proved a decided success. The construction of the wards has been eminently satisfactory. The work in the X-Ray Department has increased each year.

#### CONVALESCENT HOME.

The number of patients treated during the year was 357, who received 7,078 days' treatment at an average weekly cost of \$9.80. Although there are thirty-six beds for patients and accommodations for an increase of this number, all have never been occupied at any one time during the year, the

daily average number of patients being 19.4, and it is with difficulty that patients are persuaded to go to the home. The result is that on account of the small number of patients treated, while the expenses have practically been the same as those of the previous year, the average weekly cost has been considerably increased.

#### PATHOLOGICAL LABORATORY.

The routine work performed in the laboratory remains much the same each year. A certain amount of special research work has been done. The following figures state it concisely:

Post-mortem examinations . . . . .	195
Surgical diagnosis . . . . .	1,262
Cultures from the South Department (examination for diphtheria bacilli) . . . . .	13,559
Cultures from the main hospital . . . . .	1,107

Certain changes have been made in the laboratory, but it is advisable that many other and greater changes should be made.

The appearance of one of the rooms, the Bacteriological Laboratory, has been greatly improved during the year by the new tops put on the large central tables. These tops have been stained black by the copper-aniline method and are easily kept in good condition and highly polished by the occasional application of linseed oil. The tables in at least two of the other rooms need to be retopped and treated in the same way.

The new Bramhall-Deane autoclave in the media room has proved satisfactory in every way. It saves in steam and gas by greatly reducing the time required for sterilization and has rendered the process more accurate and effective. It has also simplified the work to some extent by obviating the former necessity of a preliminary coagulation of the blood serum.

The greatest need this coming year is to put the clinical laboratory in good condition and equip it sufficiently well so that all the different examinations and tests required by the clinical man can be performed accurately and expeditiously.

The repairs, besides repainting, needed are: To retop the central tables; to put in wall cabinets with locks so that each service can have control of its own supplies and keep them under lock and key; to build a new and efficient chemical hood; and to rearrange some of the shelves for reagent bottles.

The supplies needed are four new microscopes, so that each service can have one of its own, and a reasonably complete outfit of chemicals, apparatus and glassware, as set forth in detail in the report already submitted.

Other needs, essential but of minor importance, are the following:

The wiring of the animal pens and cages so that they will be rat-proof.

A larger supply of test tubes free from lead so that they will not resemble ground glass after heating, as is now the case, and prevent observation of the colonies of bacteria. Test tubes of the same quality as used by the Boston Board of Health are an absolute necessity for careful, intelligent work.

A dark ground illuminating apparatus for the direct and quick examination of secretions suspected to contain the treponemata of syphilis.

The work in clinical bacteriology continues about the same from year to year. A few of the unusual and more interesting infections have been encountered, notably with the anthrax bacillus, the gas bacillus, and the meningococcus. In the case of the last named organism the diagnosis practically depends on the examination of the cerebro-spinal fluid and, when positive, results in the immediate use of proper treatment with Flexner's serum.

Animal inoculation for the tubercle bacillus was, as usual, carried out in many cases where the urine and pleural fluids were suspected of containing the organism. This is practically the only method by which a positive diagnosis can be obtained and this, of course, is absolutely essential for the proper treatment of the patients.

The autopsy bacteriology has been restricted, as in 1908, to cultures from the heart's blood and to evident septic foci.

This has been necessary in order to diminish the steadily increasing amount of routine.

Blood cultures from the living patient were made thirty-one times during the year.

As in 1908 the diphtheria cultures examined have consisted of dismissal cases from the South Department. The total number this year was 13,559 as compared with 13,745 last year.

A great deal of time has been taken up during the year by the bacteriological examination of the milk received by the hospital.

*Surgical Pathology.*—The value of this line of work seems to be appreciated more and more each year, judging from the increase in the number of specimens examined, 1,262, or 230 more than last year. The surgical and gynæcological services take more interest than formerly in seeing that the material removed at operations is sent to the laboratory for diagnosis. The members of the department are frequently called in consultation in obscure and puzzling cases and in some instances have been able to clear up the diagnosis through laboratory methods.

A case of the rare tumor known as myeloma, which starts in bone marrow and is always accompanied by albumosuria, was received during the year, the first on record at the Boston City Hospital.

The number of post-mortem examinations has increased by thirty-four over the record of last year, but still remains far below what ought to be obtained.

The X-Ray Department has continued the work of making radiographs of all bodies coming to post-mortem examination, so that the results obtained can be compared with the actual lesions. In this way valuable light is thrown on appearances found in radiographs of living patients and the clinical diagnoses are rendered more accurate and useful.

For example, small shadows in the pelvis proved to be phleboliths in the pelvic veins instead of calculi in the ureters, and a supposed fecal concretion turned out to be a calcified fibroid.

*Clinical Laboratory.*—The urgent needs of this special

department have already been mentioned under laboratory equipment and do not require reiteration here.

The work done in this laboratory is of immediate, daily service to all the clinical men and to the patients in their care. The equipment, therefore, should be adequate to the demands made on the men working there, because the results obtained are of very practical value to the clinicians and to the patients, as they often determine the line of treatment to be followed.

Much work has been done during the year with the Wasserman and Noguchi serum reactions as a test for syphilis. They have been applied chiefly to clinical cases, but a series of tests has also been made with sera collected at autopsies. The results obtained have been of great value in rendering positive diagnoses which clinically were doubtful, and in throwing light on lesions found post-mortem.

The Wasserman test has been made about 250 times by Dr. William Boardman, a voluntary assistant in the laboratory, while the regular staff has used the Noguchi reaction 57 times, 45 on clinical cases and 12 on post-mortem cases.

The paper on the possible cause of scarlet fever published from the laboratory several years ago was based on certain peculiar and characteristic bodies found in large numbers in the skin of a virulent case occurring in 1897. Very recently an autopsy was obtained on a severe hæmorrhagic case which died within forty-eight hours after the appearance of the rash. In the epidermis of this case the same peculiar bodies are present in large numbers. This finding strongly favors the view that these bodies have a causative relation to the disease and naturally encourage further work along these lines, namely, to discover similar bodies, if possible, in the nasal and other secretions as an aid to diagnosis in doubtful cases, and to produce the disease in monkeys so that it can be studied experimentally.

The steady increase in the amount of routine work in the laboratory and the frequent changes in the staff interfere to a considerable extent with the research work which the material renders possible. Although but two publications have appeared, two other papers are ready and still others are under way.

The large number and variety of pathological specimens collected during the past twelve years permits now of a comparative study of the lesions of the different organs in the body. The organs which have been taken up most carefully this past year have been the liver, the kidneys, the prostate and the thyroid gland, and some interesting results have been obtained.

The following publications have appeared from the laboratory during the past year:

Chronic Pancreatitis with Tumor-like Nodules in the Cat.  
By Thomas Ordway.

Tumors in the Common Fowl. By E. E. Tyzzer and Thomas Ordway.

The laboratory continues to be frequented by a moderate number of research students, clinical internes who have finished their services in the hospital and want to brush up on laboratory methods before starting in practice, and visitors from other institutions. For example, Doctors Noguchi and Lamar of the Rockefeller Institute spent several weeks in the laboratory this past summer learning our technical methods. In return the staff was thoroughly drilled in the finer points of the Noguchi serum reaction for syphilis.

#### ESTABLISHMENT OF NEW SERVICES.

On May 19, 1909, the neurological and dermatological services were established. These two services have been needed for a long time.

#### CHANGES OF RULES.

Rules 2, 208, 209, 210, 214 and 215, covering the designations of the medical officers at the South Department, were changed by striking out the designations employed and substituting Medical Director, Physician-in-Chief, First Assistant Physician and Second Assistant Physician.

Rule 43, regarding the duties of Senior Visiting Surgeons, was changed.

## MEDICAL AND SURGICAL STAFF.

The following are the changes in the Medical and Surgical Staff during the year just closed:

Joseph W. Courtney, M. D., who had been Assistant Physician for Diseases of the Nervous System at the hospital since 1894, resigned. The trustees feel that in the resignation of Doctor Courtney the hospital lost an extremely valuable physician. Doctor Courtney has contributed numerous articles to medical journals, bearing on matters connected with his specialty.

In November, 1909, Francis S. Watson, M. D., resigned his position as Surgeon-in-Chief, to take effect January 1, 1910. Doctor Watson has been connected with the hospital as a surgeon since 1885. He has contributed very largely to medical literature on subjects in which he is especially interested. His principal monographs, of which there are many, are as follows:

Diagnosis and Treatment of Embolism of the Mesenteric Blood Vessels.

The Operative Treatment of Prostatic Hypertrophy.

Obstructive Calculous Anuria.

Tumors of the Bladder.

His phenomenal work, a work that has been quoted all over the civilized world, a work that has received the highest appreciation from surgeons in Germany and in France, is his book on genito-urinary diseases, written in conjunction with Dr. J. H. Cunningham, a member of the Visiting Staff. The appreciation of the trustees of Doctor Watson's service at the hospital is shown by the following letter sent to Doctor Watson by the Secretary of the Board of Trustees, on the receipt of his resignation:

December 8, 1909.

DR. FRANCIS S. WATSON,  
*92 Marlborough Street:*

MY DEAR DOCTOR WATSON,—The trustees of the Boston City Hospital received with much regret your resignation as Surgeon-in-Chief at the Boston City Hospital, and with equal reluctance accepted the same.

The trustees are very grateful for your expressions of appreciation of the relations which existed between yourself and the trustees during your service, and on their part desire me to express to you their gratitude for your untiring and unselfish devotion to the hospital and its patients during the many years of your service.

At the same time I have the honor to notify you that at the meeting at which your resignation was accepted the trustees elected you to the position of Consulting Surgeon, to take effect on and after January 1, 1910; and we trust that by the acceptance of this appointment you will continue to give to the trustees and to the hospital your further services and advice, which, though perhaps not as active as heretofore, the trustees feel will still be of the utmost usefulness to themselves and to our institution.

Yours very respectfully,

CONRAD J. RUETER,  
*Secretary Board of Trustees.*

William Bradford Robbins, M. D., Assistant to the Physicians for X-Ray Service, resigned.

The following promotions have been made: John L. Ames, M. D., from First Assistant Visiting Physician to Visiting Physician; Paul Thorndike, M. D., from Visiting Surgeon to Surgeon-in-Chief; Edward H. Nichols, M. D., from First Assistant Visiting Surgeon to Visiting Surgeon; William E. Faulkner, M. D., from Second Assistant Visiting Surgeon to First Assistant Visiting Surgeon; David D. Scannell, M. D., from Third Assistant Visiting Surgeon to Second Assistant Visiting Surgeon.

The following appointments have been made: Francis S. Watson, M. D., Consulting Surgeon; George B. Shattuck, M. D., Senior Physician; George H. Powers, M. D., Assistant to the Aural Surgeons.

The following temporary appointments have been made: Abraham Myerson, M. D., Temporary Assistant to the Physician for Diseases of the Nervous System for six months; Malcolm Seymour, M. D., Assistant to the Physicians to Out-Patients for six months, beginning July, 1909; Hilbert F. Day, M. D., Fourth Assistant Visiting Surgeon for Diseases of Women for six months, beginning June 1, 1909; Dunlap P. Penhallow, M. D., Fourth Assistant Visiting Surgeon for the month of October, 1909; Frederick O. West, M. D., Assistant to the Physicians to Out-Patients for six months,

beginning January 1, 1910; Robert M. Green, M. D., Fourth Assistant Visiting Surgeon for Diseases of Women for six months, beginning January 1, 1910.

---

One member of the staff, Dr. Louis T. Wilson, died. The trustees feel that in the death of Doctor Wilson the hospital sustained an irreparable loss. The estimation in which Doctor Wilson was held by the staff is conveyed in the following communication from the staff, made to the trustees at the time of his death:

Doctor Wilson's death came with peculiar bitterness to the City Hospital staff. He was one of our own, by training, tradition, appointment and promotion; he had worked with us and was to work for many years to come. He died in the institution he was serving, in spite of all its facilities and of the trained professional skill under its roof. His comrades, trained to diagnosis, were unable to discover the nature of his illness, and those who devote their days to the cure of disease were powerless to prolong his life. For these reasons, as well as for others of a personal nature, his death affects us with exceptional pain.

He was the last surgeon appointed to the staff; a hard worker, much in earnest, charitable and kindly in judgments, and absolutely loyal. As we look back he seems perhaps to have been too tireless in his duties, too forgetful of his physical needs, too ready to continue without relaxation the wearying daily exertion of hospital (and professional) service. He possessed a personal sympathy, an interest in the affairs of his comrades which made the name acquaintance ripen rapidly into the name of friend. Against more than the usual obstacles he had made his way and in his success he left no bitterness behind in the hearts of his comrades. He was tolerant of the beliefs of others, but firm in his own, a capable surgeon who had won his place, a thoughtful gentleman who looked into the future with quiet confidence.

A verse of Kipling's seems singularly appropriate:

“He scarce had need to doff his pride  
Nor slough the dross of Earth.  
E'en as he trod that day to God,  
So walked he from his birth  
In simpleness and gentleness  
And honor and clean mirth.”

For these virtues his character commends itself to his associates, and it is hereby resolved that these minutes be spread upon the records of the Surgical Section of the Staff of the Boston City Hospital.

---

## GIFTS.

On May 12, 1909, a communication was received from C. H. Watson, Ancillary Administrator of the estate of E. L. Wyman, inclosing a check for \$100, the same being the income of the estate of E. L. Wyman.

In June, 1909, a communication was received from the Committee of the Patrick A. Collins Memorial Fund, said letter being as follows:

June 3, 1909.

*To the Trustees of the Boston City Hospital, Boston, Mass.:*

GENTLEMEN,—The undersigned Committee of the Patrick A. Collins Memorial Fund, by a unanimous vote, do hereby present to the Boston City Hospital the sum of twenty-three hundred twenty-one  $\frac{61}{100}$  dollars in memory of our former distinguished citizen and honored Mayor, Patrick A. Collins, a stanch friend of the hospital and ever zealous for its best interests and welfare. Said sum to be expended as follows:

*First.* Eighteen hundred dollars for the purchase of bookcases and books for a library to be known as the "Patrick A. Collins Memorial Library."

*Second.* Five hundred dollars to be deposited with the City Treasurer of the City of Boston, and "invested according to the ordinances of the city to constitute a special fund to be known as the 'Patrick A. Collins Memorial Library Fund,' the interest of which shall be annually expended in perpetuity by the trustees for new books for the use of hospital patients, and for the replacing of those that have become either damaged, lost or destroyed."

As we desire to aid in your noble work in a way that shall help as far as possible to alleviate the sufferings of those under your care, especially those who during convalescence may have the benefits of this library, we ask your acceptance of these gifts, having in mind the good that is being done for the sick and needy of our city by this great institution.

Very truly yours,

JEROME JONES, <i>Chairman,</i>	JAMES M. PRENDERGAST,
LUCIUS TUTTLE,	EDWIN U. CURTIS,
CHARLES H. TAYLOR,	WILLIAM BYRNE,
ROBERT M. BURNETT,	A. SHUMAN,
JOHN G. BLAKE,	JAMES J. STORROW,
THOMAS B. FITZPATRICK,	M. P. CURRAN, <i>Secretary.</i>

*Collins Memorial Committee.*

The following letter was sent in reply to the foregoing communication:

BOSTON, June 19, 1909.

MR. JEROME JONES,

*Chairman of the Committee of the Patrick A. Collins Memorial Fund:*

DEAR SIR,—I am directed by Mr. Shuman, President of the Board of Trustees of the Boston City Hospital, to make grateful acknowledgment of the receipt of a check for \$2,321.61, for the purchase of books for the

patients at the Boston City Hospital. The trustees feel that this money could in no other way be more appropriately spent, and they feel that the dictates of the distinguished man for whom the memorial was erected would fully coincide with this opinion.

I remain, very respectfully,

Your obedient servant,

JOHN H. MCCOLLOM,  
*Superintendent.*

The trustees wish to express their grateful appreciation of the many gifts of flowers, fruit and pamphlets to the hospital during the past year, acknowledgment of which has been made to the individuals by letter.

The Franciscan Missionaries of St. Mary have made weekly visits to the hospital, and have done much to cheer the hearts of the patients.

On Sundays different organizations have visited the wards, and by music, vocal and instrumental, have relieved the tediousness of confinement in the hospital.

The musicians sent by Dr. John Dixwell, as in former years, have given concerts in the wards, which have been a source of great pleasure to the patients.

Clergymen of different denominations have visited patients, when requested.

The trustees wish to express their high appreciation of the valuable services of the Medical and Surgical Staff in their constant and painstaking attention to the sick, and wish to emphasize the value of the faithful interest shown to the welfare of patients and to the hospital generally.

The trustees also desire to express their grateful recognition of the devotion and services of the present superintendent and Medical Director, John H. McCollom, M. D., in all respects a worthy successor to his predecessor, Dr. G. H. M. Rowe, an honored name among all familiar with medicine and public institutions.

Respectfully submitted,

A. SHUMAN, *President.*

CONRAD J. RUETER, *Secretary.*

FRANCIS J. KEANY, M. D.

EDMUND D. CODMAN.

WILLIAM G. SHILLABER.

## REPORT OF THE SUPERINTENDENT AND MEDICAL DIRECTOR.

---

THE BOSTON CITY HOSPITAL, January 31, 1910.

*To the Trustees:*

GENTLEMEN,—I have the honor to present herewith the annual report of the Hospital Department for the year ending January 31, 1910, inclusive.

The Boston City Hospital has now been in operation forty-six years, during which time the number of house patients treated in the different departments has been 308,744 and the number of out-patients 1,048,456. The table on page 36 shows the number of patients who have applied for admission and been treated at the hospital proper and the South Department during the last ten years. The principal statistics for the year are shown on page 38. The other tables are self-explanatory.

Patients admitted to the hospital according to services:

Medical services . . . . .	3,124
Surgical services . . . . .	4,071
Gynæcological service . . . . .	1,136
Ophthalmic service . . . . .	105
Aural service . . . . .	242
Neurological service . . . . .	218
Dermatological service . . . . .	54
Total . . . . .	<u>8,950</u>

Number of visits of patients to the hospital for advice and treatment in the Out-Patient Departments:

Medical diseases . . . . .	13,810
Surgical diseases . . . . .	81,380
Diseases of the eye . . . . .	5,805
Diseases of the ear . . . . .	4,625

Diseases of the skin . . . . .	3,322
Diseases of women . . . . .	3,006
Diseases of the nervous system . . . . .	6,984
Diseases of the throat . . . . .	8,787
X-ray treatment . . . . .	2,544
Surgical out-patients treated in the accident rooms and not included elsewhere . . . . .	5,729
Total . . . . .	<u>135,992</u>

TABLE OF ADMISSIONS AND DEATHS FROM FEBRUARY 1, 1900, TO JANUARY 31, 1910.  
*Hospital Proper and South Department.*

	Patients Examined for Ad- mission.	Patients Admitted.	Patients Acciden- tally Injured.	Number of Out- patients Treated.	Number of Patients in Hospital at Beginning of Year.	Number of Patients Treated.	Died.	Rate of Mortality.
February 1, 1900, to January 31, 1901.....	16,528	11,962	1,210	27,328	745	12,707	1,500	.118
February 1, 1901, to January 31, 1902.....	15,588	10,539	1,091	28,635	772	11,311	1,314	.116
February 1, 1902, to January 31, 1903.....	14,666	9,978	1,130	32,152	614	10,592	1,088	.103
February 1, 1903, to January 31, 1904.....	15,422	10,349	953	34,734	672	11,021	1,122	.102
February 1, 1904, to January 31, 1905.....	14,974	10,837	772	37,608	711	11,548	1,160	.100
February 1, 1905, to January 31, 1906.....	13,645	10,357	738	38,650	652	11,009	1,143	.104
February 1, 1906, to January 31, 1907.....	14,943	11,679	704	37,938	673	12,352	1,332	.108

## HOSPITAL PROPER.

## PRINCIPAL STATISTICS, 1909-10.

*Number of Patients.*

Number of patients remaining in the hospital proper		
January 31, 1909	. . . . .	429
Admitted from February 1, 1909, to January 31, 1910, inclusive:		
Medical	. . . . .	3,124
Surgical	. . . . .	4,071
Gynæcological	. . . . .	1,136
Ophthalmic	. . . . .	105
Aural	. . . . .	242
Neurological	. . . . .	218
Dermatological	. . . . .	54
	<hr/>	8,950
Treated during the year	. . . . .	9,379
Discharged during the year	. . . . .	7,799
Died during the year	. . . . .	1,111
	<hr/>	8,910
Number of patients remaining in the hospital January 31, 1910 . . . . . 469		
Largest number of patients in the hospital at any one time . . . . . 552		
Smallest number of patients in the hospital at any one time . . . . . 285		
Daily average number of patients . . . . . 393		
Average number of days' stay of patients . . . . . 15.27		
Number of weeks' treatment given in hospital . . . . . 20,466		
Number of days' treatment given in hospital . . . . . 143,265		
Number of applicants for admission to hospital . . . . . 12,205		
Number of applicants rejected . . . . . 3,255		
Number of patients treated in Out-Patient Departments . . . . . 39,482		

Number of visits made by out-patients . . . . .	135,992
Patients carried in ambulances . . . . .	3,856
Number of patients accidentally injured, admitted . . . . .	928

Number of out-patients treated in the Out-Patient Departments, classified according to diseases:

For medical diseases . . . . .	5,575
For surgical diseases . . . . .	17,449
For diseases of the eye . . . . .	2,635
For diseases of the ear . . . . .	1,368
For diseases of the skin . . . . .	1,577
For diseases of women . . . . .	1,012
For diseases of the nervous system . . . . .	765
For diseases of the throat . . . . .	3,255
For X-ray treatment . . . . .	117
Surgical out-patients treated in the accident rooms and not elsewhere included . . . . .	5,729
Total number of out-patients . . . . .	<u>39,482</u>

PRESENT CAPACITY OF THE HOSPITAL DEPARTMENTS.

The schedule of beds is as follows:

Hospital proper . . . . .	655
South Department . . . . .	340
Haymarket Square Relief Station . . . . .	20
East Boston Relief Station . . . . .	10
Convalescent Home . . . . .	36
	<u>1,061</u>

The distribution of the beds in the Main Department is as follows:

	WARD.		PRIVATE.		Totals.
	Male.	Female.	Male.	Female.	
Surgical . . . . .	161	97	21	17	296
Medical . . . . .	141	108	8	7	264
Gynæcological . . . . .		51		2	53
Ophthalmic and aural . . . . .	7	9			16
Neurological . . . . .	10	10			20
Dermatological . . . . .	3	3			6
Totals . . . . .	322	278	29	26	655

## STATISTICS OF PATIENTS ACCORDING TO SERVICES.

*February 1, 1909, to January 31, 1910, Inclusive.*

SERVICES.	In Hospital February 1, 1909.	Admitted.	Discharged.	Died.	Total Discharged and Died.	In Hospital February 1, 1910.
First Surgical.....	67	1,245	1,127	118	1,245	67
Second Surgical.....	67	1,498	1,340	156	1,496	69
Third Surgical.....	64	1,328	1,205	121	1,326	66
First Medical.....	53	1,109	920	190	1,110	52
Second Medical.....	53	980	790	191	981	52
Third Medical.....	52	1,035	837	198	1,035	52
Gynæcological.....	60	1,136	1,078	67	1,145	51
Ophthalmic.....	6	105	102	1	103	8
Aural.....	7	242	220	7	227	22
Neurological.....		218	135	61	196	22
Dermatological.....		54	45	1	46	8
Totals.....	429	8,950	7,799	1,111	8,910	469

The maximum number of patients in the hospital proper at any one time was 501, and the minimum number 296.

## RECEIPTS AND EXPENDITURES.

*Receipts.*

City appropriation* . . . . .	\$600,000 00
Interest from Trust Funds . . . . .	1,964 00
Premium on coal . . . . .	17 50
Refund duplicate payment . . . . .	4 29
	<u>\$601,985 79</u>

*Expenditures.*

Hospital proper and its subdivisions . . . . .	\$314,554 41
Out-Patient Department . . . . .	20,704 31
South Department . . . . .	109,561 00
Haymarket Square Relief Station . . . . .	31,509 75
East Boston Relief Station . . . . .	15,315 71
Convalescent Home . . . . .	10,322 14
Improvement of the heating system at main hospital . . . . .	100,018 47
	<u>\$601,985 79</u>

\* Of this \$600,000, \$499,981.53 was spent for maintenance and \$100,018.47 for improvement of the heating system.

## APPLICANTS NOT ADMITTED DURING THE YEAR.

*February 1, 1909, to January 31, 1910, Inclusive.**Cause of rejection:*

For want of accommodation . . . . .	33
For want of accommodation, but admitted within three days . . . . .	9
Self-rejected or deferred . . . . .	673
Self-rejected or deferred, but admitted within three days, . . . . .	129
Self-rejected or deferred, but admitted later . . . . .	12
For want of sufficient information . . . . .	393
For want of sufficient information, but admitted within three days . . . . .	228
For want of sufficient information, but admitted later . . . . .	14
Referred to Out-Patient Departments . . . . .	1,071
Referred to South Department . . . . .	9
Nonresident . . . . .	653
Chronic . . . . .	192
Pulmonary tuberculosis . . . . .	27
Delirium tremens . . . . .	71
Venereal . . . . .	42
Pregnancy . . . . .	14
Insane . . . . .	13
Miscellaneous . . . . .	64

It will be noticed that at the South Department thirty-nine patients have been refused admission for lack of room.

The following are the principal statistics for the year:

Number of patients remaining in the South Department January 31, 1909 . . . . .	399
Admitted from February 1, 1909, to January 31, 1910, inclusive . . . . .	2,724
	<hr/>
Treated during the year . . . . .	3,123
Discharged during the year . . . . . 2,591	
Died during the year . . . . . 216	
	<hr/>
	2,807
	<hr/>
Number of patients remaining January 31, 1910 . . . . .	316
Maximum number of patients at any one time . . . . .	417
Minimum number of patients at any one time . . . . .	162
Daily average number of patients . . . . .	286.4
Average number of days' stay of patients . . . . .	33
Number of days' treatment given patients . . . . .	104,527
Number of weeks' treatment given patients . . . . .	14,932
Number of applicants for admission . . . . .	3,192
Number of patients rejected . . . . .	468
Patients carried in ambulances . . . . .	2,232
Number of patients admitted over fifteen years of age . . . . .	474
Number of patients dying within forty-eight hours of admission . . . . .	59
Average age of patients . . . . .	8.9
Percentage of deaths to discharges . . . . .	7.69
The death rate from diphtheria . . . . .	6.68
The death rate from diphtheria, deducting deaths within twenty-four hours of admission . . . . .	5.24
The death rate from scarlet fever . . . . .	4.16
The death rate from scarlet fever, deducting deaths within twenty-four hours of admission . . . . .	3.74

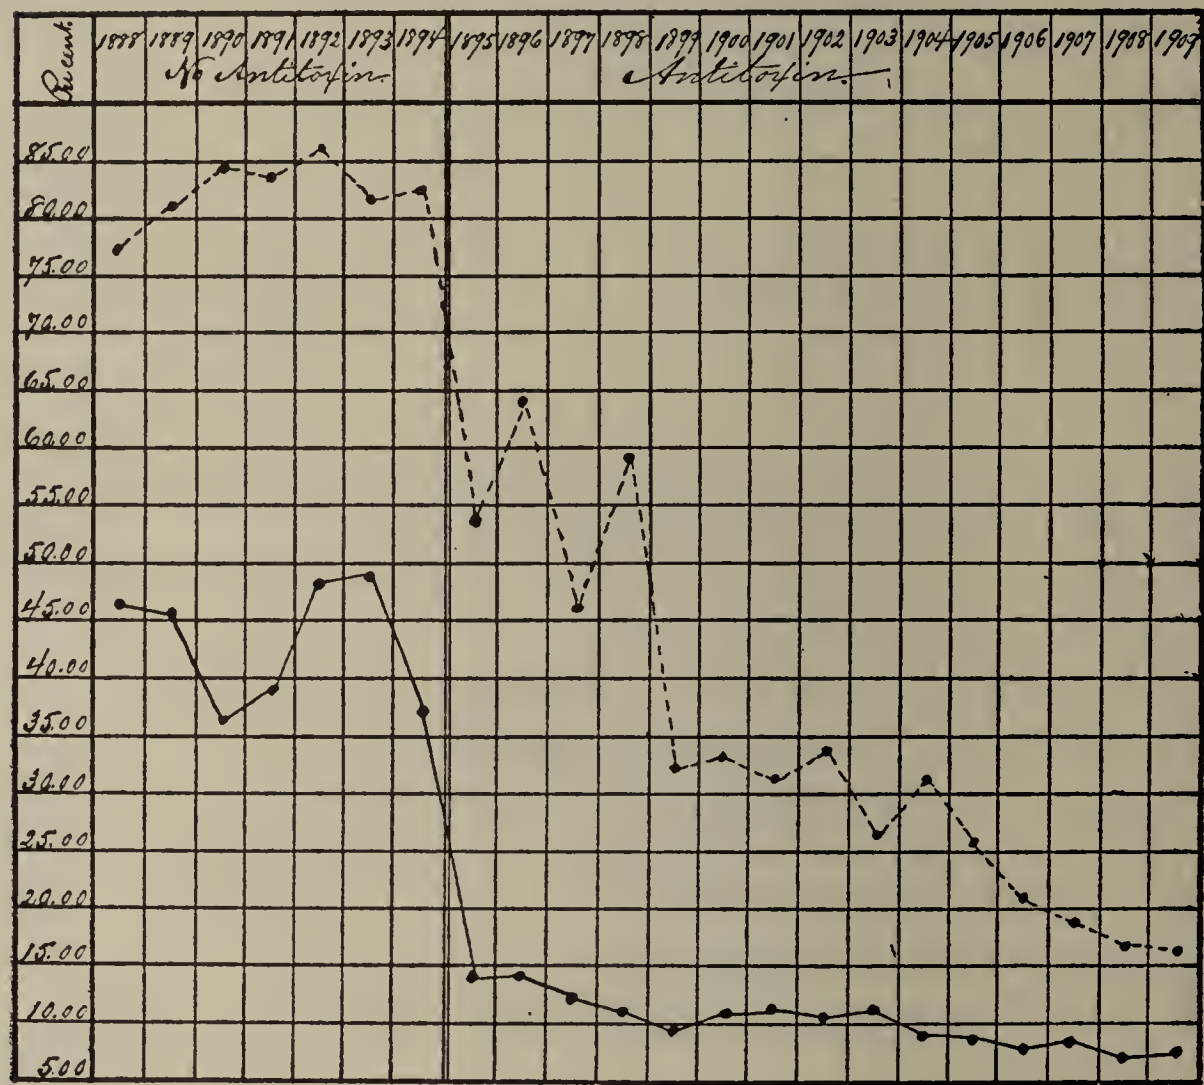

The death rate from measles . . . . .	1.4
The death rate from all diseases . . . . .	6.91
The death rate from all diseases, deducting deaths within twenty-four hours of admission . . . . .	5.60

(A)

Per cent of Mortality of Diphtheria at the Boston City Hospital proper, and at the South Department, from 1888 to 1909, inclusive. Per cent of Mortality of Intubations for the same time. From 1888 to 1894, no Antitoxin. From 1895 to 1909, Antitoxin.

Diphtheria=————— Intubation=.....

Number of days' board given persons . . . . .	153,032
Number of weeks' board given persons . . . . .	21,862
Total expenditures . . . . .	\$109,561
Average weekly cost per patient . . . . .	\$7.37

If a comparison is made between the South Department and the hospital proper as to the number of days' board given patients, it will be found that at the former it is 104,527, while at the latter it is 143,265.

## (B)

Number of Cases of Diphtheria treated at the Boston City Hospital proper, and at the South Department, from 1888 to 1909, inclusive. Number of Cases of Intubation for the same time. 1888 to 1894, no Antitoxin. 1895 to 1909, Antitoxin.

Years.	Number of Cases of Diphtheria	Died.	Percent of Mortality.	Percent of Recovered.	Number of Intubations	Died.	Percent of Mortality.	Percent of Recovered.

The effect of the South Department in reducing the death rate of diphtheria and scarlet fever has been extremely marked. As an illustration of the decrease in the death rate of diphtheria Chart A has been prepared, which shows the per cent of mortality of diphtheria at the Boston City Hospital proper and at the South Department from 1888 to 1909, inclusive, and also the per cent of the mortality of intubations for the same time. These figures are based on the calendar year, and not on the financial year.

It may be remembered that in 1888 Wards A and E were opened for the treatment of diphtheria and scarlet fever and that these wards soon became overcrowded.

(C)

Ratio of Mortality of Diphtheria per 10,000 of the Population in Boston, from 1876 to 1909, inclusive.

Average Ratio of Mortality from 1876 to 1894, inclusive, 14.25.

Average Ratio of Mortality from 1895 to 1909, inclusive, 5.17.

In 1895 the South Department was opened for the treatment of these diseases, and these wards also, after a comparatively short time, became overcrowded.

Table B gives the number of cases of diphtheria treated at the Boston City Hospital proper and at the South Department from 1888 to 1909, inclusive, and the number of cases of intubation for the same time. The effect of antitoxin in the treatment of diphtheria is demonstrated in Chart A and Table B.

Chart C gives the ratio of mortality of diphtheria per 10,000 of the population in Boston from 1876 to 1909, inclusive. It will be noticed that the average ratio of mortality

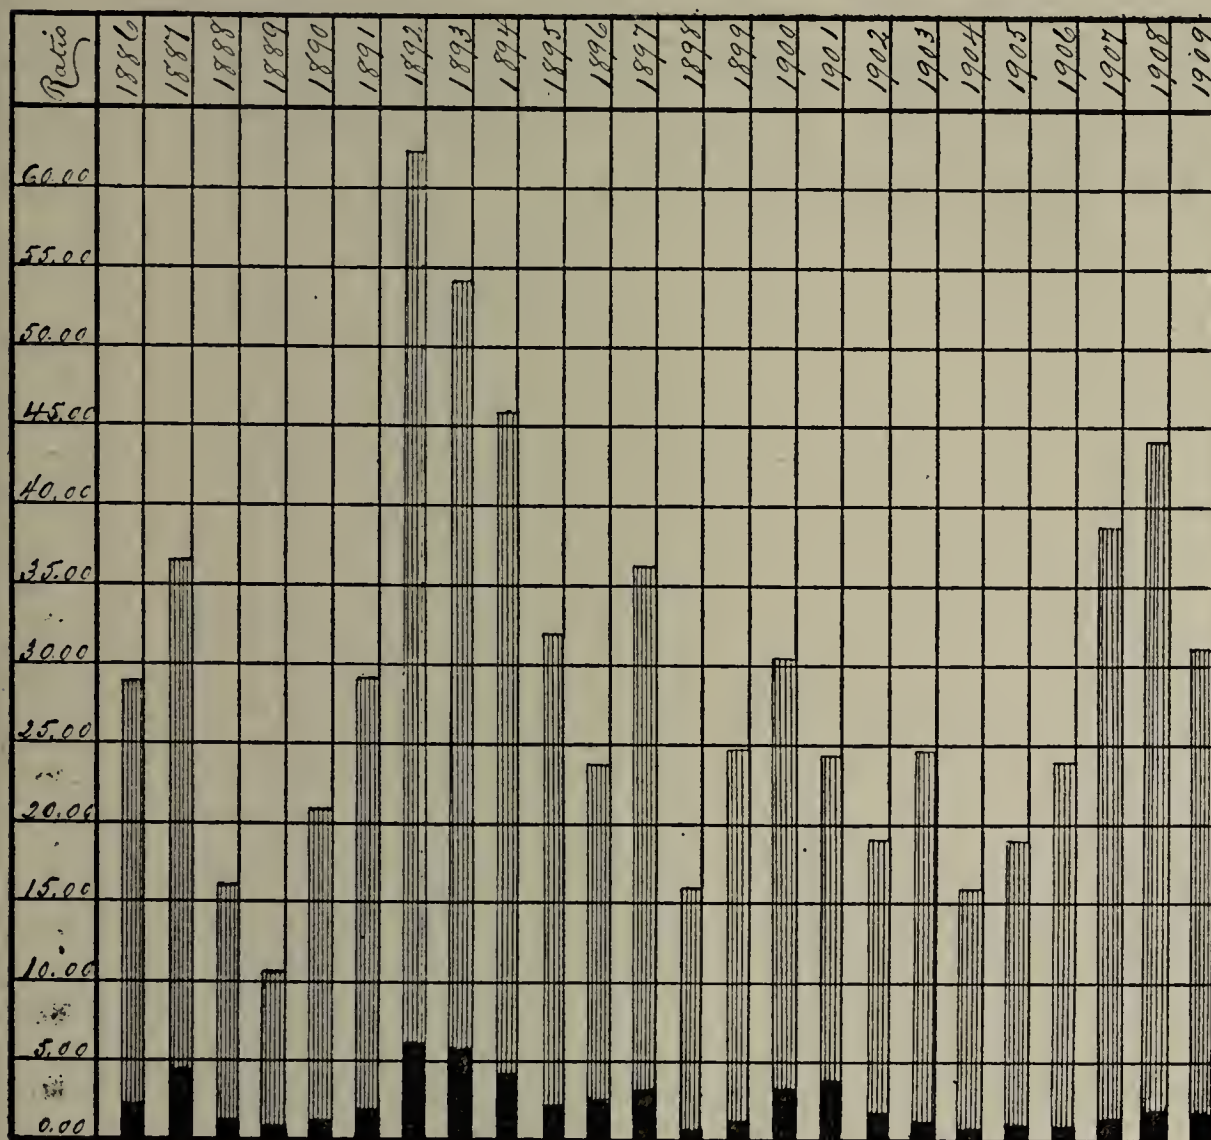

from 1876 to 1894, inclusive, was 14.25, while that from 1895 to 1909, inclusive, was 5.17, a diminution of more than one-half. This diminution in the mortality rate can only be explained by the use of antitoxin and hospital treatment.

(D)

Ratio of Morbidity and Ratio of Mortality of Scarlatina in Boston per 10,000 of the Population, from 1886 to 1909, inclusive.

Morbidity=====

Mortality=====

Average Ratio of Morbidity from 1886 to 1894, inclusive, 33.97.

Average Ratio of Morbidity from 1895 to 1909, inclusive, 27.00.

Average Ratio of Mortality from 1886 to 1894, inclusive, 2.87.

Average Ratio of Mortality from 1895 to 1909, inclusive, 1.61.

The effect of the South Department in diminishing the ratio of mortality of scarlet fever is shown in Chart D. It will be noticed in this chart that since 1895, when the hospital was opened, there has been no general epidemic of scarlet fever in Boston as compared with previous years. The

epidemic of the year ending January 31, 1909, and also that for the year ending January 31, 1910, were controlled by means of the South Department. If there had been greater accommodations, so that patients ill with scarlet fever could have been admitted immediately to the South Department, these outbreaks would not have been so general. As it is, the ratio of mortality for 1909 is not very high, being only one and a fraction. The average ratio of morbidity from 1886 to 1894, inclusive, is 33.97. The average ratio of morbidity from 1895, the year that the South Department was opened, to 1909, inclusive, is 27. For the corresponding periods the ratio of mortality in the first period is 2.87, while that in the second is 1.61.

(These figures include all departments of the hospital except Out-Patient Departments.)

The tables of disbursements in this report show the expenditures of the Hospital Department during the fiscal year February 1, 1909, to January 31, 1910, inclusive. Table No. 1 shows the disbursements according to various subdivisions. Table No. 2 shows the cost per patient per day in the different departments for the year ending January 31, 1910. Table No. 3 shows the cost per patient per day for the year ending January 31, 1910. Table No. 4 shows the operating expenses for the year ending January 31, 1910. Table No. 5 shows the disbursements from February 1, 1909, to January 31, 1910, inclusive, in all departments. Table No. 6 is a comparison of the census and expenditures at the Boston City Hospital for the fiscal years ending January 31, 1905, 1906, 1907, 1908, 1909 and 1910. Table No. 7 shows the comparative net cost per patient at the main hospital, including the South Department, for twelve years. Table No. 8 shows the cost of maintenance for a house officer per day for the year ending January 31, 1910. Table No. 9 shows the cost of maintenance for a nurse per day for the year ending January 31, 1910.

The total expenditures during the fiscal year for the Hospital Department, in its various branches, have been \$601,985.79 and the disbursements have been made as follows:

Hospital proper . . . . .	\$314,554 41
Out-Patient Department . . . . .	20,704 31
South Department . . . . .	109,561 00
Haymarket Square Relief Station . . . . .	31,509 75

Cost per day . . . . .			\$1 13
Cost per annum per nurse . . . . .			\$412
Daily average number of nurses at hospital proper during 1909-10, including matron, etc. . . . .			115

The main hospital has four subdivisions, the hospital (wards) proper, Out-Patient Departments, the Pathological Department and the X-Ray Laboratory. The expenditures for the South Department for infectious diseases, the Haymarket Square Relief Station, the East Boston Relief Station and the Convalescent Home are kept in separate tables.

The expenditures upon the hospital proper and the South Department, together, were for the care of 12,502 patients in the wards for 247,792 days, or 35,399 weeks' board, which makes an average weekly cost of \$12.11, or a daily cost of \$1.73 for patients of all classes. The net cost per patient per week to the city was \$8.39. The cost of uncooked food

\* The actual uncooked food, provided for nurses themselves, cost 38 cents per day. The additional 4 cents is for food supplied domestics who cared for the nurses at Vose House.

supplies for all persons, including patients and the entire household at the hospital proper and South Department, was \$126,659.46. The average number of patients was 679; of officers and employees, including house and nursing staff, 534, or a total daily average of 1,213 persons. The number of weeks' board for all persons was 63,274 and the weekly cost per person for uncooked food supplies was \$2, or  $28\frac{4}{7}$  cents per day.

The annual cost of the main hospital and that of the South Department are kept separately, in order to know the comparative costs and for the proper financing of the heaviest expenditures of the Hospital Department. But, practically, both divisions are for patients suffering with acute illnesses, and separated for purely hygienic rather than for financial reasons. Considered from this point of view, as a part of one whole, the cost is as follows:

The average weekly expenditure per patient in the hospital proper was \$15.54; the South Department was \$7.37; or an average of \$12.11 for each patient in the two departments. After deducting the income received on account of paying patients, the cost was reduced in the main hospital to \$12.18, at the South Department to \$3.20; or an average weekly per capita for each patient of \$8.39, which accurately represents what each patient cost the city. No account is made in this computation of either the Out-Patient Departments, Convalescent Home or the Relief Stations.

The total expenditures in the Hospital Department have been \$601,985.79, but the net cost to the city for maintaining the hospital proper was only \$374,118.25.

The maximum number of patients in the hospital proper on any one day was 552, as against 513 in the previous year. The minimum number was 285, in comparison with 348 for the previous year. The daily average during the year was 393, and the average length of stay was  $15\frac{2}{10}$  days.

There have been treated in the various Out-Patient Departments 39,482 patients, at a cost of \$20,704.31. Other statistics may be found elsewhere, including the number of out-patients, number of their visits, rate of mortality, work of ambulances, census of days' board for all persons, the

nativity of patients admitted and physical condition of patients when discharged.

The total number of deaths from February 1, 1909, to January 31, 1910, was 1,111. This does not include the statistics of the South Department, but only the main hospital.

Of the deaths, there occurred within 48

hours of admission . . . . .	408, or $4\frac{3}{10}$ per cent.
Other deaths . . . . .	703, or $7\frac{5}{10}$ per cent.

---

Total . . . . .	1,111, or $11\frac{8}{10}$ per cent,
-----------------	--------------------------------------

the rate of mortality for the year ending January 31, 1910.

This percentage of deaths is for the *total number of patients treated* in the hospital. The deaths occurring within forty-eight hours of admission (408) were 36.72 per cent of the whole number of deaths (1,111).

During the year 9,379 patients were treated in the wards, 39,482 as out-patients, 357 at the Convalescent Home, 3,123 at the South Department; at the Haymarket Square Relief Station 746 were treated in the wards and 35,025 as out-patients, and at the East Boston Relief Station 224 were treated in the wards and 8,226 as out-patients,—a total of 96,562 who have received the benefits of the hospital in all departments.

During the year 12,205 persons applied for admission. Of this number 8,950 were admitted and 3,255 were rejected, the latter being 1,100 less than last year. The number rejected was 27 per cent of all persons applying, and the causes of rejection appear in the table of applicants not admitted, on page 41. Of the number applying 814 either changed their minds or were admitted later; of these, 129 were received within three days after application and 12 admitted still later. There were 42 applicants rejected for want of vacant beds, but of these 9 were admitted later. There were 1,071 of these applicants who could be treated more properly in the various out-patient services without the additional cost of receiving them in the wards. Admission was denied to 635 for lack of information that they were suitable cases, but 242 were admitted later; and 192 were

rejected as apparently incurable or unsuitable for treatment here. Various other causes of rejection appear in the tabulated form on page 41.

*South Department.*—The total expenditure for the South Department was \$109,561, against \$140,037.47 for the previous year; and allowing for the difference in stock at the beginning and close of the year, the sum of \$110,027.20 represents the cost of maintenance for the fiscal year. The per capita weekly cost at the South Department was \$7.37.

*Out-Patient Services.*—The expenditure in the various out-patient services was \$20,704.31.

*Convalescent Home.*—The cost of maintenance for the Convalescent Home was \$10,322.14. The daily average was  $19\frac{4}{10}$  patients, and the average weekly cost \$9.80.

HAYMARKET SQUARE RELIEF STATION.

Since the Haymarket Square Relief Station has been remodeled the work of this department has been conducted satisfactorily.

The following are the principal statistics of the Haymarket Square Relief Station for the year:

Number of patients remaining in Haymarket Square	
Relief Station January 31, 1909 . . . . .	0
Admitted from February 1, 1909, to January 31, 1910, inclusive . . . . .	746
	<hr/>
Treated during the year . . . . .	746
Discharged during the year . . . . .	598
Died during the year . . . . .	136
	<hr/>
	734
Number of patients remaining in Haymarket Square	
Relief Station January 31, 1910 . . . . .	12
Number of out-patients treated . . . . .	35,025
Largest number of out-patients treated on any one	
day . . . . .	163
Number of major surgical operations . . . . .	117
Number of deaths . . . . .	136

Number of deaths within twenty-four hours of admission . . . . .	107
Number of days' treatment given patients in the wards,	1,915
Largest number of ward patients on any one day .	16
Smallest number of ward patients on any one day .	0
Average stay of ward patients in days . . . . .	2.6
Daily average in wards . . . . .	5.3
Number of ambulance calls . . . . .	1,451
Number of ambulance trips for transfers of admitted patients to hospital proper . . . . .	312
Miscellaneous ambulance trips . . . . .	59
	<hr/>
	1,822
Number of patients transferred to hospital proper .	464
Number of cases brought by police ambulances and patrol wagons . . . . .	1,037
Number of cases brought by carriages and automobiles,	294
Total expenditures . . . . .	\$31,509.75

## EAST BOSTON RELIEF STATION.

The following are the principal statistics for the year:

Number of patients remaining in the East Boston Relief Station January 31, 1909 . . . . .	4
Admitted from February 1, 1909, to January 31, 1910, inclusive . . . . .	220
	<hr/>
Treated during the year . . . . .	224
Discharged during the year . . . . .	196
Died during the year . . . . .	28
	<hr/>
	224
	<hr/>
Number of patients remaining in East Boston Relief Station January 31, 1910 . . . . .	0
Number of out-patients treated . . . . .	8,226
Largest number of out-patients treated on any one day . . . . .	59
Number of major surgical operations . . . . .	17
Number of deaths . . . . .	28
Number of deaths within twenty-four hours of ad- mission . . . . .	22
Number of days' treatment given patients in the wards,	831
Largest number of ward patients on any one day .	6
Smallest number of ward patients on any one day .	0

Average stay of ward patients in days . . . . .	3.8
Daily average in wards . . . . .	2.3
Number of ambulance trips for transfers of admitted patients to hospital proper . . . . .	48
Number of patients transferred to hospital proper . . . . .	66
Number of cases brought by police ambulances, patrol wagons, carriages and automobiles . . . . .	402
Total expenditures . . . . .	\$15,315.71

## CONVALESCENT HOME.

The statistics of the Convalescent Home, which has just completed its nineteenth year, are as follows:

Number of patients in Home January 31, 1909 . . . . .	27
Admitted during the year . . . . .	330
	<hr/>
	357
Discharged during the year . . . . .	337
	<hr/>
Number remaining in home January 31, 1910 . . . . .	20
Largest number on any one day . . . . .	35
Smallest number on any one day . . . . .	7
Daily average number of patients . . . . .	19.4
Average length of stay in days . . . . .	19.8
Total expenditures . . . . .	\$10,322.14

The carpenters and painters have been employed at the main hospital in keeping the buildings in good repair. The screens and storm steps have been thoroughly inspected each year, and are in fairly good condition. At the South Department the East and West Pavilions, with the exception of one or two small rooms, have been thoroughly painted. This work was necessary for purposes of sanitation. A coat of fresh paint is one of the very best disinfectants that there is. There is still a great deal of work to be done, so far as repairs are concerned, not only at the main hospital, but at the South Department, Convalescent Home and Relief Stations. When it is taken into consideration that there are forty-five buildings connected with the hospital, it is evident that the amount of repairs each year must necessarily be very great.

MEDICAL LIBRARY.

At the close of the last year there were 3,605 volumes in the Medical Library. There have been added during the year, by purchase, forty, and by donation, twenty, or a total of sixty, making a total of 3,665 volumes in the library. During the year 508 periodicals, 223 medical monographs and 165 hospital and health reports have been received.

The index card catalogue to the clinical records has been increased by 4,050 cards, making a total of 270,560 references. A new filing cabinet was purchased for the Record Room and about 20,000 medical diagnosis cards filed therein during the year.

TRAINING SCHOOL FOR NURSES.

The Training School for Nurses has now completed its thirty-first year. The changes in the nursing staff during the year have been as follows:

SUMMARY FROM FEBRUARY 1, 1909, TO FEBRUARY 1, 1910.

February 1, 1909, the number of nurses was . . .	<u>169</u>
--	------------

During the year nurses have left as follows:

Have been graduated . . . . .	38
Head nurses resigned . . . . .	13
Head nurses promoted . . . . .	1
Pupils dropped for various causes . . . . .	32
Probationers not accepted . . . . .	15
Medfield Hospital nurses withdrawn . . . . .	2
Graduate special nurses withdrawn . . . . .	3
	<hr/>
Total vacancies . . . . .	<u>104</u>
Number remaining . . . . .	65
Graduates returned for positions . . . . .	19
Pupil nurses readmitted . . . . .	27
Probationers admitted . . . . .	64
Pupil nurses admitted from Medfield Hos- pital . . . . .	4
Graduate special nurses employed . . . . .	4
	<hr/>
Remaining January 31, 1910 . . . . .	<u>183</u>

Nurses connected with the school, in the main hospital,  
January 31, 1910:

Assistant superintendents of nurses	. .	4	
Head nurses (third-year graduates)	. .	7	
Head nurses (second-year graduates)	. .	10	
Senior assistant nurses (third year)	. .	42	
Senior assistant nurses (second year)	. .	14	
Junior assistant nurses	. . . . .	38	
Probationers	. . . . .	12	
Graduate special nurses	. . . . .	5	
		—	132

In the South Department, January 31, 1910:

Day supervisor of nurses	. . . . .	1	
Night supervisor of nurses	. . . . .	1	
Head nurses (second-year graduates)	. .	5	
Senior assistant nurses (second year)	. .	23	
Junior assistant nurses	. . . . .	12	
		—	42

Relief Stations:

Head nurse (third-year graduate)	. . .	1	
Senior assistant nurses (third year)	. . .	6	
		—	7

Convalescent Home:

Matron	. . . . .	1	
Head nurse	. . . . .	1	
		—	2
			<u>183</u>

The Training School has graduated thirty-eight nurses during the year, making a total of 1,005 since it was organized.

The Superintendent of Nurses and her assistants have given 241 class recitations at the hospital proper and 139 at the South Department, making a total of 380 during the year. The teacher of the preparatory class has had daily drills in the practice room and class instruction in the schoolroom. The school has received thirty lectures, on Friday afternoons, from members of the medical and surgical staff and others.

The pupils of the third year have received medical and surgical clinical teaching from Dr. Ralph C. Larrabee and Dr. David D. Scannell.

Courses in bacteriology have been given the senior nurses of the second year, in the Pathological Building, by the First Assistant in Pathology.

Mrs. Boland Pequignot has given twenty-three practical lessons in cooking and serving of food to sections of ten senior nurses. The probation classes have been instructed by Mrs. Pequignot in the preparation of the lighter diets and in the making of the various drinks for invalids.

Mrs. Gulli J. Callowhill has given seventy-four lessons in massage to classes of four pupils each. Twenty-eight senior pupils have completed their obstetrical training in lying-in hospitals in Boston and Providence, and ten pupils are now taking the training.

The first graduating exercises of the Training School for Nurses were held in the Amphitheater on May 28, 1909. An address was made by Dr. George W. Gay, Senior Surgeon, and the diplomas were presented by the Superintendent, Dr. John H. McCollom. Following these exercises a reception was held in the Vose House.

The nurses have been remembered with season tickets for the Art Club exhibitions and in other ways.

Gifts of flowers, music, toys, reading matter and rides for the patients, from the Boston Young Men's Christian Union, have been received.

#### CHANGES IN EXECUTIVE DEPARTMENT.

Upon the retirement of George H. M. Rowe, M. D., as Superintendent and Resident Physician, on February 1, 1910, John H. McCollom, M. D., became Superintendent and Medical Director.

Appleton W. Smith, M. D., First Executive Assistant, resigned February 11, 1909, to become Superintendent of the Hartford Hospital, Hartford, Conn., and on February 11, 1909, Arthur J. White, M. D., was promoted to the position of First Executive Assistant, Irving T. Cutter, M. D., made Second Executive Assistant and Michael J. Shaugh-

nessy, M. D., appointed Third Executive Assistant. Irving T. Cutter, M. D., Second Executive Assistant, left March 16, 1909, and Michael J. Shaughnessy, M. D., became Second Executive Assistant. On June 9, 1909, Edmund W. Wilson, M. D., was appointed Third Executive Assistant. On July 17, 1909, Michael J. Shaughnessy, M. D., resigned as Second Executive Assistant, and Edmund W. Wilson, M. D., became Second Executive Assistant. On July 30, 1909, William J. Brickley, M. D., was appointed Third Executive Assistant. On November 10, 1909, Daniel F. Maguire, M. D., Assistant Resident Surgeon at the East Boston Relief Station, resigned to become an assistant surgeon in the United States Army, and William J. Brickley, M. D., was transferred to the East Boston Relief Station as his successor. On November 12, 1909, James W. Manary, M. D., was appointed Third Executive Assistant to fill the position made vacant by Doctor Brickley's transfer.

Miss Ida A. Nutter, Second Assistant Superintendent of Nurses, resigned June 19, 1909. Miss Annie L. Rand was appointed Second Assistant Superintendent of Nurses June 25, 1909. Miss Ellen Smith, Assistant Matron, resigned July 31, 1909, and Miss Mary A. Douglass was appointed Assistant Matron.

On January 21, 1910, Martin J. English, M. D., was appointed Second Assistant Physician at the South Department, in conjunction with Cadis Phipps, M. D.

On April 27, 1909, Miss Alice M. Gaffney resigned as Matron of the East Boston Relief Station and Mrs. Josephine Higgins was made Matron.

In the Pathological Department the following changes have occurred: On June 9, 1909, the resignations of Thomas Ordway, M. D., First Assistant in Pathology, Samuel R. Haythorn, M. D., Second Assistant in Pathology, and Dr. Herman M. Adler, Assistant in Clinical Pathology, were accepted. Dr. Ordway resigned to accept a position as Director of the Bender Hygienic Laboratory, Dr. Haythorn to become Assistant in Pathology at the Harvard Medical School and Assistant Pathologist to the Long Island Hospital and Dr. Adler to accept the position of Assistant Physician and Pathologist

to the Danvers Insane Hospital. On the same date Archibald W. Hunter, M. D., was appointed First Assistant and Dr. Oliver S. Hillman Second Assistant in Pathology. On June 25, 1909, Dr. Charles L. Overlander was appointed Assistant in Clinical Pathology.

---

I wish to express my heartfelt appreciation of the careful co-operation of the heads of departments during the year. I wish, also, to emphasize the cordial relations existing between the Staff and the Executive Department.

In presenting the forty-sixth annual report, I wish to express my thanks to the trustees for their continued support and confidence.

I have the honor to be,

Very respectfully,

Your obedient servant,

JOHN H. MCCOLLOM,  
*Superintendent and Medical Director.*

## SURGICAL OPERATIONS.

## ON HOUSE PATIENTS IN THE SURGICAL SERVICES.

From February 1, 1909, to January 31, 1910, Inclusive.

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
CLOSING OF WOUNDS:										
Washing, cleansing, dressing, dressing, suturing, etc.....	24	5	29	.....	27	.....	2	.....	29	
Excision and drainage.....	241	71	312	.....	276	.....	25	11	312	{ Endocarditis and Broncho-pneumonia, 11 days. Anthrax, 24 hours. Pneumonia, 4 days. Myocarditis, 1 day. Septicæmia, 8 days. Septicæmia, 6 days. Septicæmia, 1 day. Septicæmia, 1 day. Septicæmia, 1 day. Septicæmia, 1 day. Septicæmia, 3 hours.
Excision of tissue.....	67	23	90	1	83	.....	2	4	90	{ Septicæmia, 30 days. Pneumonia, 8 days. Pneumonia, 13 days. Empyæma, 30 days.
Excisions upon skin and appendages.....	9	2	11	.....	11	.....	.....	.....	11	
Excisions upon bones:										
Fracture:										
a. Simple.....	23	8	31	.....	30	.....	1	.....	31	
b. Compound....	36	3	39	.....	29	.....	7	3	39	{ Pulmonary Hæmorrhage, 2 days. Taboparesis, 4 days. Alcoholism, 4 days.
For correction of deformity.....	20	7	27	.....	23	.....	3	1	27	Periarthritis, 2 weeks.
For Osteomyelitis...	9	1	10	.....	9	.....	.....	1	10	{ Septicæmia and Pneumonia, 20 days.
Lymphaticectomy.....	1	.....	1	.....	.....	.....	.....	1	1	Pneumonia, 3 days.
Excision of rib....	8	.....	8	.....	7	.....	.....	1	8	{ Intestinal Hæmorrhage, 35 minutes.
Craniotomy:										
Exploration.....	5	1	6	.....	3	.....	.....	3	6	{ Meningitis, 9 days. Meningitis, 1 month. Embolism, 2 weeks.

SURGICAL OPERATIONS.—*Continued.*

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
b. For bony lesions,	10	2	12	....	4	....	....	8	12	{ Intracerebral Hæmorrhage, 4 hours. Intracerebral Pressure, 1 day. Shock, 6 hours. Shock, 6 hours. Shock, 4 hours. Pneumonia, 2 hours. Meningitis, 16 days. Fracture of Skull, 4 hours.
c. For brain lesions,	12	3	15	....	9	....	1	5	15	{ Shock, 2 hours. Hæmorrhage, 8 hours. Meningitis, 27 days. Sinus Thrombosis, 4 hours. Cerebral Thrombosis, 3 days.
d. For gunshot wounds.....	1	....	1	....	1	....	....	....	1	
e. Upon bones other than skull.....	8	1	9	....	4	....	2	3	9	{ Pyæmia, 4 days. Hæmorrhage, 6 days. Hæmorrhage, 6 hours.
Amputations:										
a. Finger or toe....	31	1	32	....	30	....	2	....	32	
b. Upper Extremity:										
Hand.....	4	....	4	....	2	....	2	....	4	
Arm.....	2	....	2	....	1	....	....	1	2	Pneumonia, 7 days.
c. Lower Extremity:										
Foot.....	4	....	4	....	3	....	....	1	4	
Leg.....	8	1	9	....	5	....	....	4	9	{ Septicæmia, 12 days. Shock, 12 days. Exhaustion, 17 days. Pneumonia, 2 days. Pneumonia, 14 days.
Thigh.....	7	1	8	....	3	....	1	4	8	{ Gas Bacillus Infection, 3 days. Arteriosclerosis, 3 days. Diabetic Coma, 5 days. Septicæmia, 4 days.
Hip joint.....	....	1	1	....	1	....	....	....	1	
Operations upon Joints and Ligaments:										
a. Reduction of dislocation.....	6	1	7	....	5	....	1	1	7	Septicæmia, 1 day.
b. Incision and drainage.....	16	3	19	....	17	....	....	2	19	{ Shock, 1 day. Septicæmia, 6 days.
c. Resection or excision.....	8	7	15	....	13	....	1	1	15	Septicæmia, 7 days.
d. Arthrodesis.....	....	1	1	....	1	....	....	....	1	
e. Foreign bodies...	2	....	2	....	2	....	....	....	2	

SURGICAL OPERATIONS.— *Continued.*

IN CHARGE OF DRs. JOSLIN, ROBEY, LARRABEE, WHITE, LOCKE AND LIBBY.

From February 1, 1909, to January 31, 1910, Inclusive.

## SPECIFIC INFECTIOUS DISEASES.

Typhoid Fever.....	22
Pneumonia.....	34
Parotitis, Epidemic.....	14
Pertussis.....	12
Erysipelas.....	13
Malarial Fever.....	12
Influenza.....	17
Gonorrhœal Infection.....	25
Syphilis.....	68
Cerebro-spinal Fever.....	1
Vaccinations.....	205
Other diseases of this class...	29

## CONSTITUTIONAL DISEASES.

Rachitis.....	7
Diabetes.....	2
Diabetes Mellitus.....	35
Obesity.....	14
Other diseases of this class...	18

DISEASES OF THE RESPIRATORY  
SYSTEM.

Adenoids and Tonsils.....	55
Pharyngitis.....	60
Tonsillitis.....	104
Laryngitis.....	41
Coryza.....	28
Other diseases of this class...	10

*Of the Bronchi.*

Bronchitis.....	318
Asthma.....	32
Bronchiectasis.....	1

*Of the Lung.*

Tuberculosis.....	264
Emphysema.....	14
Chronic Interstitial Pneumonia.....	10
New growths.....	1

*Of the Pleura.*

Pleurisy.....	131
Empyæma.....	2
Pleurodynia.....	4

DISEASES OF THE CIRCULATORY  
SYSTEM.*Of the Heart and its Membranes.*

Pericarditis.....	5
Endocarditis.....	244
Myocardial Disease.....	68
Aneurism.....	2
Neuroses.....	8
Stokes-Adams Disease.....	1
Other diseases of this class...	8

*Of the Blood Vessels.*

Arteriosclerosis.....	69
Aneurism, Thoracic.....	2
Phlebitis.....	3
Varicose Veins.....	20
Hæmangioma.....	1

DISEASES OF THE BLOOD AND  
DUCTLESS GLANDS.

Chlorosis.....	3
Pernicious Anæmia.....	1
Anæmia (secondary).....	20
Purpura Simplex.....	2
Purpura Rheumatica.....	2
Purpura Hæmorrhagica.....	2
Leukæmia, myelogenous.....	1
Goitre.....	8
Exophthalmic Goitre.....	6
Erythrocythemia.....	1
Other diseases of this class...	27

DISEASES OF THE DIGESTIVE  
ORGANS.

Alveolar Abscess.....	4
Stomatitis.....	18

*Of the Œsophagus.*

New growth.....	2
-----------------	---

*Of the Stomach.*

Gastritis.....	74
Dilatation.....	2
Faulty Feeding.....	54
Ulcer.....	15
Cancer.....	8
Acute Dyspepsia.....	49
Hyperacidity.....	21
Subacidity.....	11
Other diseases of this class...	41

*Of the Intestines.*

Catarrhal Enteritis.....	7
Diarrhœa.....	31
Habitual Constipation.....	378
Appendicitis.....	42
Other diseases of this class...	98

*Of the Liver, Bile-Ducts and Portal Vein.*

Acute Catarrhal Angiocho- litis.....	7
Cholecystitis.....	4
Gallstones.....	7
Chronic Interstitial Hepatitis,	40
New growth.....	1
Other diseases of this class...	3

*Of the Peritoneum.*

Peritonitis.....	7
Tubercular Peritonitis.....	3
Other diseases.....	2

DISEASES OF THE URINARY  
SYSTEM.*Of the Kidney, Pelvis of Kidney  
and Bladder.*

Nephritis.....	93
Tuberculosis.....	1
Hydronephrosis.....	1
Pyelitis, Chronic.....	4
Renal Calculus.....	3
New growth.....	1
Movable Kidney.....	7
Cystitis.....	4
Enuresis.....	27
Other diseases of this class..	23

## DISEASES OF THE JOINTS.

Arthritis.....	27
Atrophic Arthritis.....	14
Hypertrophic Arthritis.....	46
Infectious Arthritis.....	136
Other diseases of this class..	53

DISEASES DUE TO ANIMAL  
PARASITES.

Tænia.....	12
Trichiniasis.....	1
Filariasis.....	2
Echinococcus Disease.....	1
Uncinaria.....	3

## POISONS.

Alcohol.....	89
Lead.....	14
Opium Habit.....	1
Tobacco.....	1
Tea.....	1

## MISCELLANEOUS.

Dog-bites.....	12
Debility.....	133
Enteroptosis.....	5
Senility.....	4
No disease.....	95
Eloped.....	15
No diagnosis.....	736
Diagnosis deferred.....	128
Diseases of Ear.....	21
Diseases of Eye.....	19
Gynæcological Diseases.....	187
Surgical diseases.....	80
Referred to other depart- ments.....	18

## DISEASES OF THE SKIN.

Dermatitis.....	11
Eczema.....	26
Herpes Zoster.....	17
Scabies.....	18
Erythema Nodosum.....	2
Pediculosis.....	22
Other diseases of the skin...	38

## DISEASES OF THE MUSCLES.

Injury (including strain)...	16
Muscular Rheumatism.....	25
Lumbago.....	11

Myalgia.....	24	Meningitis.....	1
Other diseases.....	8	Mental Affections.....	3
DISEASES OF THE PERIPHERAL NERVES.		Dementia Præcox, Kata- tonic form.....	2
Neuritis.....	14	Feeble-minded.....	2
Neuralgia.....	48	Idiocy.....	1
Multiple Neuritis.....	13	Nervous Depression.....	1
Angioneurotic Œdema.....	2	NEUROSES AND CONDITIONS WITH- OUT RECOGNIZED PATHOLOGY.	
Raynaud's Disease.....	1	Cephalalgia.....	10
Other diseases.....	2	Chorea.....	32
DISEASES OF THE SPINE.		Eclampsia.....	2
Caries.....	1	Epilepsy.....	19
Torsion.....	1	Hysteria.....	17
Other diseases.....	7	Migraine.....	14
DISEASES OF THE SPINAL CORD.		Neurasthenia.....	73
Amyotrophic Lateral Sclerosis,	1	Occupation Neuroses.....	3
Tabes Dorsalis.....	13	Paralysis Agitans.....	1
DISEASES OF THE BRAIN.		Vertigo.....	3
General Cerebral Affections..	8	Other diseases of this class..	8
			<hr/>
			Total patients..... 5,575
			<hr/> <hr/>

OUT-PATIENT DEPARTMENT.

## SURGICAL.

IN CHARGE OF DRs. FAULKNER, HUBBARD, CRANDON, SCANNELL, HOWE,  
CHEEVER, BINNEY, CUNNINGHAM AND WILSON.

**From February 1, 1909, to January 31, 1910, Inclusive.**

GENERAL INJURIES.		MUSCLES, TENDONS AND FASCIÆ.	
Contusions.....	123	Muscles:	
Wounds.....	2,258	Wounds.....	21
GENERAL DISEASES.		Ruptures, Contusions, etc.,	229
Anthrax.....	1	New growths.....	1
Gonorrhœal Septicæmia....	2	Tendons:	
Hydrophobia.....	4	Division.....	43
Dog-bite.....	17	Rupture.....	4
Tuberculosis.....	36	Teno-synovitis.....	155
Syphilis.....	142	Ganglion.....	66
Parasitic diseases.....	49	Palmar Abscess.....	117
SKIN.		Tuberculosis of Tendon	
Wounds.....	2,377	Sheaths.....	9
Burns.....	575	Dupuytren's Contraction.	10
Frostbite.....	46	Trigger Finger.....	3
Painful Scars.....	40	Hammer Toe.....	27
Contracted Scars.....	30	BURSÆ.	
Ulcer.....	564	Bursitis.....	323
Dermatitis.....	220	BONES AND JOINTS.

## THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

---

The trustees of the Boston City Hospital, in 1878, established a Training School for Nurses, the fourth organized in the United States, in order to give to women desirous of becoming professional nurses a systematic course of training and practice.

The Training School is controlled by the trustees of the hospital, like all other departments of the hospital service. The Superintendent of the Hospital has the general supervision of all matters relating to the school, its course of work and study, lectures and discipline. The Superintendent of Nurses has the immediate charge of all the nursing in the hospital, of all persons employed in the wards, and also the instruction and management of the nurses in the Training School. All female nurses in the hospital must be connected with the school.

The hospital in all its departments contains 1,061 beds for patients, as follows:

Main hospital . . . . .	655
South Department for Infectious Diseases . . . . .	340
Haymarket Square Relief Station . . . . .	20
East Boston Relief Station . . . . .	10
Convalescent Home . . . . .	36
<hr/>	
Total . . . . .	1,061

The number and variety of cases in each department afford ample material for observation and instruction. The course requires three years, and includes general medical and surgical nursing, together with ophthalmic, aural and gynæcological nursing, also the nursing of children, and infectious diseases and of emergency surgical work. There are no maternity wards connected with the hospital, but a course in maternity

nursing has been provided at maternity hospitals elsewhere, without extra cost to the nurse.

The most desirable age for candidates is from twenty-three to thirty-five years. They must be of sound health and should send with their application a certificate from a physician certifying to the fact. They should also send a brief personal history, and give the names and addresses of three responsible persons, not of their own kin, preferably their last employer, if any, or business men of their acquaintance who know of their good character and capabilities. Upon the recommendation of the Superintendent of the Hospital and Superintendent of Nurses they will be received for three months on probation. The fitness of candidates for the training and work and the propriety of retaining or dismissing them will be determined by the authorities in charge of the school, under the direction of the trustees. An entrance examination is given to all candidates before or during the term of probation. The examination is in simple arithmetic, English composition and writing from dictation, etc., and is in no sense so severe as to prevent anyone who is capable of undertaking the work of a trained nurse from so doing. The Superintendent of Nurses will have a personal interview with candidates for the school on Tuesdays from ten to twelve o'clock.

At the end of the second month candidates, if considered satisfactory, are permitted to wear the cap and enter upon the regular course of training, but such candidates are not permitted to join the school formally until the end of the third month, when, if accepted, they sign an agreement to complete the prescribed course of three years and to conform to all rules. At the end of the first six months the record and work of each pupil are carefully scrutinized as to her fitness to make a good nurse, and the right is reserved by the authorities of the hospital to terminate then, or at any time, the connection of any pupil or nurse with the school for inefficiency, misconduct, generally unsatisfactory record or for any other reason which may be deemed sufficient.

The nurses in the Training School (including probationers) reside at the three nurses' homes connected with the hospital.

These houses are attractive and homelike and have the best of conditions necessary to good health and personal hygiene, while recreation and amusement necessary to a wholesome life have been considered in the music room, library and reception rooms provided.

The Superintendent of Nurses has the immediate charge of the Training School, under the authority of the Superintendent of the Hospital and of the trustees, and the nurses are subject to the rules of the hospital like any other service.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc., giving baths, keeping patients warm or cool, prevention or dressing of bed sores and proper management of the patient under various conditions with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus, applying of fomentations and poultices, the dressing of burns, ulcers and wounds and other minor dressings, cupping, leeching and subsequent treatment, the administering of enemata and the use of the female catheter.

Nurses are taught how to act in the various emergencies occurring in hospital and private nursing as well as in the accidents of ordinary life. They are also given lessons in massage by a professional instructor. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner and the feeding of helpless patients or those who resist food.

Instruction is also given in the best practical methods of supplying fresh air, of warming and ventilating sick rooms in a proper manner, and the proper care of sick rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin and eruptions; of mental condition as to delirium, stupor, shock, etc., of the condition as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds and

the after treatment in surgical operations and in the managing of convalescents. Nurses are taught the administering of medicines and the application of external remedies, how to take notes on cases, the making up of the nurses' record and the reports to the attending doctor.

The three years' course of training includes a preparatory course of three months, under a special instructor, followed by a fixed course of instruction from manuals and text-books, mainly given by the Superintendent of Nurses, the assistant superintendents of nurses and graduate head nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes and models is considerable, the main reliance is upon accurate daily drill in the wards, operating rooms and other departments of the hospital. Examinations, both oral and written, are held from time to time by the authorities of the school, and nurses will not be graduated unless they attain, on critical marking, at least 70 per cent.

The pupils are employed as assistant nurses in the wards, operating rooms, Out-Patient Departments of the hospital and the two Relief Stations. They are given eight months' training in medical wards, eight months in surgical wards, six months in contagious wards, four months in gynæcological wards, four months in a maternity hospital and from three to six months elective. No class recitations or lectures are given between July 1 and October 1, except to the probation class.

Probationers are not paid during their first two months, but for the remaining ten months of the first year they receive \$50, for the second year \$100 and for the third year \$150, to pay for the expenses of their uniform, personal clothing and other minor requirements. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services. When the term of three years is completed the nurses receive, if they pass all the examinations and are

otherwise satisfactory, a diploma certifying to the regular course of training and practice, and are then permitted to wear the graduate's badge of the school.

The majority of graduates engage in private nursing, but some are invited to remain in the service of the hospital as head nurses, with opportunities of promotion here or in other hospitals. Graduate head nurses who prefer to remain in hospital work, or return after a term of private nursing, are given post-graduate instructions in ward management, hospital housekeeping and minor administration, fitting them to fill positions of trust in hospitals or other institutions.

The school year has no fixed date, but accepted candidates are, as a rule, received in classes beginning every three months. Those desiring to enter with less delay can sometimes anticipate a fixed date by placing themselves on the emergency list. When coming to the hospital they should bring with them the following articles: Three gingham or calico dresses, made plainly; eight large white aprons, made of bleached cotton, two yards wide, meeting in the back, with bibs, without straps, plain at the top and gathered slightly at the bottom, two pearl studs on the band, two inches wide, with hem at bottom five inches in depth and two inches from the bottom of the dress; two bags for soiled clothes, one pair of scissors, a pin-ball and a plain napkin ring with nurse's name; a good supply of plain underclothing — every article to be distinctly marked with pen and indelible ink with the owner's name. Twenty-one pieces are allowed for the laundry each week.

Nurses must bring suitable outer garments for stormy weather, and they are required to wear boots that will be purchased on prescription of our orthopedic surgeon after coming to the hospital. If the teeth are out of order in any way they must receive attention before coming for the probationary month. Nurses are required to wear the Training School uniform after they join the school. Material for dresses will be sold at cost price; caps are furnished at a nominal price. Probationers should come prepared, on acceptance, to expend about \$20 for uniforms, books and other needful expenses.

Hours of duty for day nurses will vary from six to twelve hours, between the hours of 7 a. m. and 8 p. m.; for night nurses, from 8 p. m. to 7 a. m. No nurse is required to do both day and night duty on the same day, except in rare emergencies. Each nurse on day duty is allowed one hour after 1.30 o'clock p. m. for rest and recreation, one half-day after 1.30 p. m. each week and four hours on Sunday. Two weeks' vacation with pay is allowed each year, and one week without pay, as leave of absence during the third year. If nurses are sick they are cared for in the hospital, but pay is stopped, except for illness or injury received in the line of duty. Pupils may be expected to have a percentage of any considerable time lost by illness or absence added to their three years, at the discretion of the management. Nurses on night duty are required to be in bed from 9 a. m. until 4 p. m. Nurses may be called upon for six months' regular night duty during the three years' training, besides "special cases" to a limited number.

## COURSE OF INSTRUCTION.

### I. PROBATIONERS' COURSE.

The first week the probation class meets in the practice room daily for practical instruction in the making of beds, including the use of bed rests, cradles, etc.

The care of rooms, sweeping and dusting.

Care of set bowls, wall stands and utensils.

Care of linen rooms, the folding of linen.

The use of hot and cold applications, including the making of fomentations and poultices.

The care of rubber goods.

The making of surgical supplies, pads, sponges, tampons, etc.

The use of slings, binders and supports.

During this time the class is instructed in the use of anti-septics, disinfectants and deodorants, and the preparation of solutions.

Tables of weights and measures.

The use of abbreviations and symbols.

The principles of ventilation.

The temperature of the body. Heat production and radiation.

The use of the clinical thermometer and charts.

The giving of baths, care of the back, mouth, etc.

From the seventh (7th) to the tenth (10th) day allowed to go to the wards, make beds, sweep, dust and fold linen (hours from 7 to 10.30 a. m.).

The tenth (10th) day assigned to wards for regular duty, and during the remaining weeks of the probation course three hours each day will be devoted to class and practice room work, with one additional hour for recreation.

*Total Hours of Study and Ward Work in Three Months' Probation.*

Anatomy, Physiology and Hygiene . . .	66 hours.

General Review of Course . . . . . 12 recitations.  
 Elective Work in Operating Rooms, Out-Patient Departments, Relief Stations, Contagious Wards and Housekeeping Department.

An excellent reference library is open to nurses for more extended reading upon subjects under consideration.

### LIST OF LECTURES AND SUBJECTS.

A lecture is given to the Training School on Fridays at 4 p. m. in the Operating Amphitheater by a member of the Medical and Surgical Staff, once a week between September 15 and June 30. The following are among the lectures given at various periods during the training:

*Three.*—Theory of wounds: Modes of healing, granulations, ulcers, cellulitis, suppuration, slough, erysipelas, pyæmia, gangrene, sepsis, etc. (with stereopticon).

*Six.*—Bacteriology, brief history and general theory: Micro-organisms; general distribution in air, water, etc. Elementary consideration of pathogenic and non-pathogenic micro-organisms. Exhibition of apparatus and cultures. Practical points for nurses.

*Two.*—Surgical anatomy and landmarks, hæmorrhages, etc.

*One.*—Fractures: Varieties, preparation and care of splints and apparatus for treatment, management of cases, etc.

*Three.*—Medicines: Avenues of taking; preparation of doses; classes of internal and external poisons; cautions; hospital formulæ.

*One.*—Nursing in fevers: Theory of fever, symptoms and course of, different plans of treatment, nurses' duties as to symptoms, bed clothing, secretions, baths, food and management of cases.

*Four.*—Infectious fevers, especially diphtheria and scarlet fever: Symptoms and course of disease; complications; infection and contagion; special nursing in croup, laryngitis, tracheotomy, intubation, etc.; management of patient and surroundings; personal hygiene of nurse in attendance, etc.

*Two.*—Symptomatology in disease: What and how to observe accurately; vital organs and special symptoms. The

model sick room: Temperature, light, ventilation, care of bed, bedding and clothing, furniture, utensils, disinfectants, cleansing, dusting, etc.

*Three.*—Care of children in health and disease: Diet and clothing of infants and children; various infantile diseases.

*Two.*—Physiology of pregnancy and labor: Delivery and confinement nursing.

*One.*—On gynæcological nursing: Preparation of patient for examination or operation; operations after treatment, douches, use of catheter, etc. (Demonstrations to sections of senior nurses in Ward S operating room.)

*One.*—Special nursing in nervous diseases, including the insane.

*One.*—Special nursing in diseases of the eye and general care in health and disease.

*One.*—Special nursing in diseases of the ear, its care in health and disease; nurses' duties at operations and continued treatment in disease.

*One.*—Urine: Characteristics, properties, including taking notes on same and brief analysis. Drill in laboratory by classes in sections.

*Three.*—Visceral anatomy: Demonstrations by post-mortems, care of the dead, etc.

*One.*—Suggestions to those about to engage in private nursing.

*Five.*—Sociology: By leading workers in sociology.

HOUSE RULES.

---

WITH RULES FOR ADMISSION, GOVERNMENT AND DISCHARGE  
OF PATIENTS; ALSO RULES FOR VISITORS.

## HOUSE RULES.

The doors and gates of the hospital will be closed at 10 o'clock in the evening, at which time all inmates shall be quiet and all not on duty shall be in their rooms, unless otherwise specifically permitted.

All officers, nurses and employees of the hospital, when going and coming to and from the hospital, shall enter and go out by the entrance office, and by no other entrance. Such officers and employees as are required shall use the time register and method of booking that the hospital rules require.

A record shall be kept of all persons entering the hospital between the hours of 10 o'clock in the evening and 7.30 o'clock in the morning.

No employee shall be absent from the hospital except when permitted by special rules or by the Superintendent.

No officer, nurse, orderly or other employee shall, directly or indirectly, receive money or other gifts from or in behalf of patients, except with the approval of the Superintendent.

The use of tobacco, wine and intoxicating liquors is prohibited within the hospital, unless prescribed by the physicians or surgeons.

All profane and improper language, loud talking and incivility are prohibited.

All employees shall observe such further rules and directions for their conduct as may from time to time be established.

## ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the hospital on each day of the week, Sunday excepted, between 9 o'clock a. m. and 6 o'clock p. m.

Whenever able a patient shall apply in person for admis-

sion; when not able to apply in person a patient may be admitted on application made in his behalf, or upon visit at his residence by the admitting physician.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Patients may be admitted to the privileges of the hospital at such rates of board as the trustees may from time to time by vote determine, payment for such board being secured by the friends of the patients or by the authorities of the cities or towns to which the patients belong.

Whenever, in the opinion of the trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the hospital, are provided, such payment shall be made therefor as the trustees shall deem reasonable.

No person having acute venereal disease or alcoholism shall be admitted, except as a paying patient.

No person shall be admitted to the hospital whose case is judged to be incurable, unless there be urgent symptoms which are deemed capable of being relieved.

#### GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the hospital.

Patients shall be in their proper places in the wards during the visits of the physicians and surgeons, and always before 7.30 o'clock in the evening, unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing and perform such other services as may be reasonably required of them.

No patient shall leave the hospital grounds without a pass from the Superintendent, nor leave his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, or any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be granted when practicable.

Complaints, for whatever cause, may be made to the Superintendent, and whenever requested shall be by him reported to the trustees.

#### DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent.

Patients discharged on the recommendation of the visiting physicians or surgeons shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the hospital without the approval of the Superintendent a written statement to that effect shall be required from any person assuming the responsibility of the removal.

#### VISITORS.

No person shall visit any part of the premises except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent or of some one of the trustees.

Daily, from 2 to 3 o'clock in the afternoon, friends may be permitted to visit patients, though no patient shall receive more than two visitors at that hour; and from 6 to 6.30 o'clock on each week day friends may be permitted to visit patients, though no patient shall receive more than one visitor at that hour. In all cases, however, the trustees and Superintendent may exercise discretionary powers as to excluding or admitting visitors.

When visitors are admitted outside of the regular visiting hours they shall not be permitted to remain more than half an hour, except a special permission to remain for further time is granted.

All visitors shall leave the hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the hospital, or pass the night therein, without permission of the Superintendent or one of the trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left at the entrance office.

## SPECIAL RULES FOR THE GOVERNMENT OF THE SOUTH DEPARTMENT.

---

The Department of the Boston City Hospital located on the westerly side of Massachusetts avenue shall be designated as the South Department of the Boston City Hospital. It shall receive patients who require treatment for diphtheria and scarlet fever, and for other infectious diseases as may be determined from time to time by the trustees.

The Superintendent of the Hospital shall, under the direction of the trustees, have the general control and management of this department in the same manner as of other departments of the hospital.

The rules of the hospital shall, so far as applicable, and except as hereinafter provided, apply to the various officers and employees and to the conduct and management of this department.

---

## SPECIAL RULES FOR THE GOVERNMENT OF THE HAYMARKET SQUARE RELIEF STATION.

---

The Boston City Hospital Relief Station is established not as a hospital but as a department of the Boston City Hospital for temporary relief, and the rules and methods prevailing now in the hospital shall, so far as applicable and not inconsistent with special rules, apply to the Relief Station.

The station shall afford temporary relief in all classes of accident and disease. It shall be open at all hours for patients requiring treatment or attention. Patients requiring ward treatment, whether received at the station or taken up in ambulances, shall, so far as consistent with their welfare, be forthwith transferred or carried to the hospital for extended treatment, but ward accommodations shall be afforded

patients whose condition is such that they cannot properly be transferred. Patients may, however, if it is deemed desirable, be transferred by the ambulances to other hospitals or to their homes. First treatment may be afforded at the station, although the applicants are not such as require ward treatment.

The Superintendent of the Hospital shall have the general administration, management and control of the station the same as of other departments of the hospital.

The Superintendent shall, from time to time, as may be necessary, nominate for confirmation by the trustees a Resident Surgeon and one or more Assistant Resident Surgeons, and shall appoint and employ or detail for service in this department, subject to the approval of the trustees or of the proper committees, a Matron, a Supervisor, nurses, orderlies and such other minor employees as may be required for the proper conduct of the station, who shall be subject to his supervision.

The various officers and employees of the station shall perform such duties, other than those specified, as may be required by the trustees or the Superintendent, according to the nature of their respective duties. The Resident Surgeons, the Matron, Supervisor and such other officers as may be so required shall reside at the station.

#### AMBULANCE SERVICE.

The ambulance service of the station shall be under the direct control of the Resident Surgeon, and shall co-operate with that of the hospital, with which it shall form one general system. Ambulances shall, in response to calls, be dispatched from the station or the hospital as the exigency may require. The utmost dispatch shall be exercised in the ambulance service, so far as is consistent with a regard for the welfare of the patient and the interest of the public.

Ambulances shall in general be sent from the station or the hospital at least upon a general alarm to all fires occurring in the city proper and in such further districts as may be determined upon.

An ambulance shall be held during the hours of the day in complete readiness to make immediate response to calls, and shall be kept in condition to make prompt response to calls at any time of the night.

A house officer shall accompany the ambulance, shall direct its course and shall have direction of the care and treatment of the patient until received at his destination.

The foreman of the ambulance service at the Hospital Station shall visit and inspect the Ambulance Department of the station from time to time, but the immediate carrying out of directions shall be under the assistant foreman at the station.

#### PATIENTS.

Alcoholic and insane patients shall not be received, unless there is surgical or medical complication making hospital treatment absolutely necessary.

No patient, after being admitted to the wards, shall leave the station until his discharge without a pass from the proper officer, nor shall he visit other parts of the station without permission.

Ward patients shall be discharged by the Superintendent or Resident Surgeon.

---

#### SPECIAL RULES FOR THE GOVERNMENT OF THE EAST BOSTON RELIEF STATION.

---

The rules for the management of the East Boston Relief Station are similar to those of the Haymarket Square Relief Station.

## SPECIAL RULES FOR THE GOVERNMENT OF THE CONVALESCENT HOME.

---

The department of the Boston City Hospital located on Dorchester avenue, in Dorchester, shall be known as the Convalescent Home, and shall receive such patients recovering from acute diseases as shall be transferred to it from the main hospital for treatment during convalescence.

The Superintendent of the Hospital shall, under the direction of the trustees, have the control and management of the Convalescent Home in the same manner as of other departments of the hospital.

The Superintendent shall appoint, subject to the approval of the trustees, a Matron, and shall employ, under their direction, such further assistants as may be necessary for the proper conduct and service of the home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the home and the control of all nurses and other employees and patients. She shall reside at the home.

### VISITORS.

Friends may be permitted to visit patients on week days, between three and four o'clock in the afternoon. In all cases the trustees, Superintendent and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the home and grounds at the expiration of the visiting hour, and shall visit no part of the home or grounds other than the reception room, except by permission from the proper authority.

No person shall give any article of food or drink to a patient unless by permission of the Matron.
